EOLO-H 50 kW

wind turbine

ecosolutionitalia

Soluzioni Energetiche Innovative

Turbine

Rated power 50 kW
 Max Power 72 kW
 Cut-in wind speed 3 m/s (6.7 mph)
 Rated Wind speed 10 m/s (22.3 mph)
 Survival wind speed 50 m/s (111.5 mph)
 Design lifetime 20 years
 Overall weight 3120 kg (6878.3 lbs)

Rotor

Rotor diameter 18.0 m (59.1 ft)
 swept area 254.3 m² (2741.9 ft²)
 Rotor speed 60 rpm
 Blade material Fiber Glass

Generator

Drive Type Direct Drive (Without Gearbox)
 Generator Type Permanent Magnet Generator
 Generator Voltage 360 VDC (Grid-off)
 450 VDC (Grid-on)
 Efficiency 95%

Controller

Control System PLC with Touch Screen
 Remote Monitoring Optional

Safety

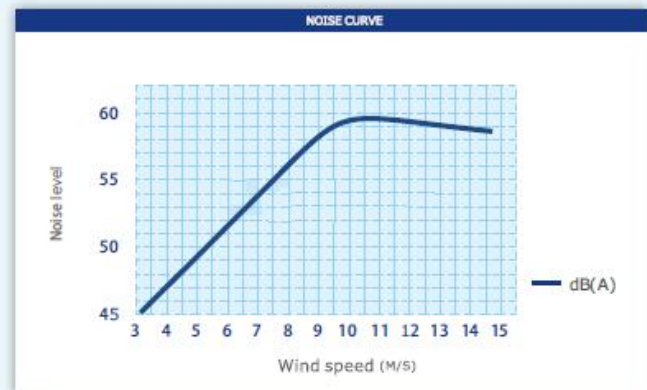

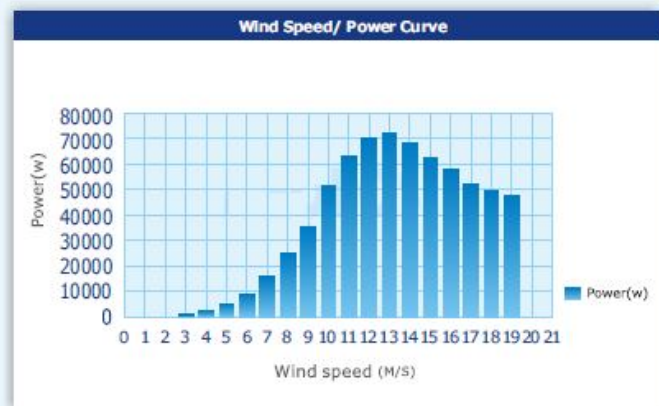

Main Brake System Yaw Control & Electronic Brake
 Secondary Brake System Mechanical Hydraulic Brake

Tower

Monopole Tower 18m 24m 30m
 Hydraulic Tower 18m 24m

Warranty

Standard warranty 5 years

Eolo-H 50kW Wind Turbine Output								
Wind Speed(m/s)	3	4	5	6	7	8	9	10
Generator Power(w)	825	2274	5400	9650	15983	25430	35420	50210
Annual Energy Output(kwh)	14454	35856	80417	135254	210017	311874	403363	527808

Why Choose EOLO-H 50kW Wind Turbine?

Triple Safety & Brake Protection

Yaw Control: PLC controller will control the yaw motor to deviate wind turbine from the wind direction at an angle of 30 degrees, 60 degrees or 90 degrees when it detects the faults of over wind speed, over voltage or generator over temperature.

Electronic Brake: Eolo-H 50kW has a 75kw dump load box and uses PWM technology as the electronic brake control. PWM could control the over voltage and turbine over speed smoothly.

Mechanical Brake: As the secondary protection system, mechanical brake was driven by high quality German hydraulic station. It could stop the wind turbine rotor in over speed, over voltage, over temperature or grid failure.

High Efficiency & Reliable Design

Eolo-H 50kW uses a directly driven generator without gearbox or booster device. The generator is directly driven by blade rotor. It has 30% more power output than induction generator at the same wind speed.

The directly driven design is more reliable than the induction generator with gearbox. All of the mechanical and electronic components choose the best quality manufacturers like SKF, ABB and Omron. All of designs follow the less or free maintenance principles.

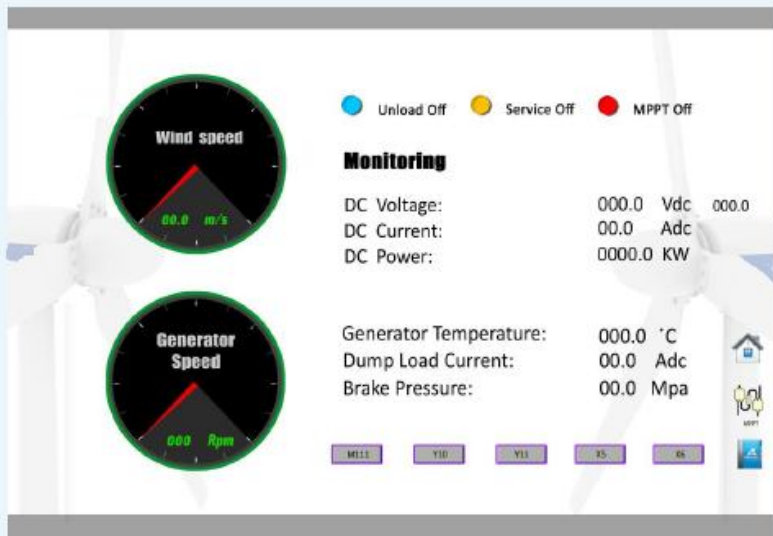

5 YEAR WARRANTY

Intelligent Control & Remote Monitoring

Eolo employs Programmable logic controller (PLC) and touch screen as the control system. All the operation data like wind speed and power output can be recorded and customer can easily adjust the protection data of wind speed, voltage, current and rpm through controller.

Touch Screen

Eolo provides remote monitoring function to the customers. You can remotely monitor and control the wind turbine operation through wireless or wire internet in home, office, airport and anywhere.

Remote Monitoring Software

50kW Grid On System Wiring Diagram

Solution I

Eolo - H 50 kW wind turbine could perfectly match with Power One MSWI 50kw inverter. The MSWI 50kw inverter will save the cost than multiple inverters solution but it required the wind turbine controller to command and control the inverter power output.

Ecosolution and PowerOne did many works in house and onsite to ensure the system matching perfectly.

Solution II

Eolo - H 50 kW wind turbine could connect with 9 x 6kw SMA Inverters for a 50kw grid on system solution. SMA Wind boy inverters were widely applied in Eolo wind turbines from 3kw to 50kw.
